

**BEAVER DAM WATER UTILITY**  
1213 North Center St  
Beaver Dam, WI 53916

**(920) 887-4624**

**July 5, 2017**

**ATTENTION**  
**Hydrant Flushing Notice**

The Beaver Dam Water Utility staff will be flushing fire hydrants in various locations of the city for (2) weeks beginning July 10 with completion expected by July 21.

Flushing will occur between 7:00 a.m. and 3:00 p.m. daily, Monday - Friday. There may be instances where flushing is required on Saturday or Sunday in certain areas.

Residents may notice discolored or cloudy water while a hydrant in the area is being flushed. This condition may remain until after flushing in the area is complete and the water lines are cleared. Leaving taps or a garden hose on full flow for a short time should clear the discoloration.

Water discoloration and cloudiness is caused by the dislodging of minerals and other sediments that have collected in the water mains over several months or years. The water is not harmful to drink, but may cause laundry stains. If the water does not clear within a reasonable amount of time, please call the Water Utility at 887-4624.
